

Optimized for the small.
Insured for the big.

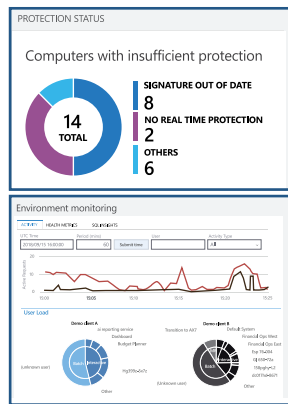

Keep Your Azure Cloud Ready with CSP Services

Sierra Systems, an NTT DATA Company, delivers a fully-managed Microsoft Azure managed service, complete with Microsoft-certified Azure engineers, cloud optimization tools, monitoring and reporting. Our managed services team monitors availability and capacity and enhance your Azure operational health and security.

Reports are based on your business operations. Insight into Azure's current and anticipated future-state are paired with your organization's technical environment and business needs to find optimal configurations. Our access to consumption tools and licensing certainties analyze your Cloud usage, pinpointing opportunities in cost reduction – i.e. VMs unnecessarily left on overnight.

How Can We Help?

- ✓ Health Check Reporting
- ✓ Support Services
- ✓ Server Sizing
- ✓ Patches and Protection
- ✓ Managed Data Protection
- ✓ Managed Recovery

All Azure reports are reviewed by Sierra Systems' Azure professionals to find optimal strategic direction for your environment.

Find safety today by shifting your Azure CSP to Sierra Systems' pan-Canadian service team.
