

## SOLUTION BRIEF

### Our Industries

Government  
Justice and Public Safety  
Health  
Energy  
Commercial

### What we deliver

- Forward looking strategy to create the end-state vision.
- Actionable and detailed implementation plan for business analytics.
- Realistic plan considering business and technical realities of the organization.
- Business requirements, technology, business transformation, and governance recommendations.

## BUSINESS ANALYTICS STRATEGY

### CHALLENGE

The challenge many organizations face is how to take their business analytics concept and transform it into a working system. Whether you are new to business analytics or are extending an existing solution, a well-thought out plan and actionable strategy is essential to success.

### OUR SERVICES

Our combined health check and roadmap services help to clarify organizations' key goals, and our actionable and detailed implementation plan illustrates and demonstrates a realistic path forward for both business and technology teams.

**Health Check:** We review your current business analytics capacity and compare it against industry accepted best practices. Our professionals review the existing infrastructure, information products, and interview key business and IT resources. We then deliver a formal document comparing it against industry best practices with recommendations for improvement.

**Roadmap:** This forward looking enterprise strategy is tailored to your unique business needs and includes an iterative implementation plan that is low risk and builds a business analytics solution over time. The roadmap takes into consideration business requirements, technology, business transformation, governance recommendations, and change management.

## Business Analytics Strategy Foundation Layers

Business Requirements	Business Objectives	KPI's	Business Processes Subject Area	User Profiles
Technology Functionality	Toolsets	Information Products	Architecture	Configuration
Business Transformation	Business Challenges	Business Readiness	Cultural Shifts	Change Management
Governance Structure	Governance Model	Roles Responsibilities	Sustainment
