

Did You Know You Can Be Liable for Your Cloud's IT Security?

Your Cloud Security Today

Many executives are surprised to learn that protection of client data is primarily the responsibility of the data owner, not the cloud solution partner. Complicating this, few IT departments have the time or resources to track the ongoing changes to cloud offerings, even in mainstream solutions, such as Office 365 and Azure.

Sierra Systems, an NTT DATA Company, provides guidance to firms that need to optimize their own cloud security configurations to protect themselves and their clients' data. Sierra Systems' Cloud Care solution provides a detailed review of your Microsoft IT environment in a matter of days.

Evolving Microsoft's latest guidelines for cloud security, our Azure experts modify these configurations to the business needs of your organization. Looking beyond the cloud, this detailed risk assessment and security review incorporates the specifics of your operational environments, security configurations, and business processes.

Your Cloud Security Tomorrow

Sierra Systems' *Application Managed Services* (AMS) continuously evaluates your cloud security and issues. As your Digital Partner of Record, holistic knowledge of your system is leveraged for live threat-management as well as long-term cloud security.

Cloud Care Check

The solution provides custom recommendations to guide cloud security, with:

- ✓ Private evaluation of your cloud security's rank against Microsoft's suggested posture
- ✓ Detailed end-to-end security review of your cloud environment
- ✓ Guidance for GDPR compliance
- ✓ Preventative actions to reduce risk of malware and virus attacks
- ✓ Expert mitigation strategies specific to your cloud-based environment
- ✓ Details on industry response to new updates, legislation, and threats

AMS Services

Combined with Sierra Systems' AMS Team, additional services include:

- ✓ End-to-end cloud support services
- ✓ Score tracking over time to measure effect of changes to security policies
- ✓ Proactive threat containment based on your cloud configuration

Our Industries

The cloud has reduced IT health checks into reviews of security policies and settings.

For organizations requiring more than industry-standard security, Sierra Systems' Cloud Care outlines steps designed to reduce risk exposure by adapting best practices to your cloud's unique governance, configurations, integrations, and workflow processes.

Accelerating IT

Sierra Systems' 50+ years of deep expertise in targeted industries has built our reputation of delivering superior solutions that strengthen organizations' performance.
