OUR SERVICES AND SUCCESSES

Sierra Systems provides a depth and breadth of services: from helping you with strategy and assessment, to helping you design, build, buy, implement solutions, to helping you with ongoing support and enhancements. Below are just some of our successful health industry engagements conducted in Canada.

- HL7 and FHIR-based Information Exchanges and data sharing with Registries and Clinical Information Systems.
- Microsoft Dynamics CRM Case Management solutions for enterprise and departmental needs.
- Change Management and Clinical Process Transformation solutions to support the adoption of clinical and administrative quality improvements and effective process management.
- Identity Management and Registry solutions for provincial and territorial organizations including the Provider Registry Solution for the PRS Collaborative as well as Client Registry Solutions for BC, Alberta, Manitoba, and Nova Scotia.
- ICT Strategy and Roadmap for health system policy makers and funders, regulatory colleges, eHealth organizations.
- Clinical Systems Integration and Implementation for hospitals, emergency departments, ambulatory care, community clinics, labs and diagnostic services, long term care facilities, and many others.

We help clients realize their vision through:

- **Strategy Development, Planning, and Evaluation** – We help clients create their visions, plan new solution deployments, and evaluate existing systems in place.
- **Project Management** – Sierra Systems leverages over 50 years of project management experience to help successfully manage solution implementations.
- **Integrating Systems** – Our team can integrate new solutions into your existing health information systems environment, using industry standard messaging and interfaces.
- **Change Management** – We help our client's staff adopt and adapt to new business processes, ensuring that new solutions are adopted and used to their maximum potential.
- **Systems Development** – Sierra Systems can custom develop a solution – in whole or in part. Or, we can provide technical and business expertise to implement package solutions from leading software vendors.
