MICROSOFT SHAREPOINT HEALTH CHECK

CHALLENGE

Your Microsoft SharePoint environment may include a broad spectrum of content, technical infrastructure, configuration, and services that are owned and managed by different groups. Each department and stakeholder can have different and sometimes even conflicting requirements, which can lead to a disconnect from the overall objectives of the organization. The health check is simply a way to determine the best return on your SharePoint investment and alignment with organization's goals.

OUR SOLUTION

A SharePoint health check can prevent disconnect between users, improve performance, enhance stability, and align to your business objectives. Leveraging our strong knowledge and best practices gained from implementing SharePoint platforms in a variety of industries, Sierra Systems will document your current SharePoint platform and recommend improvements to meet both your current and potential future needs.

OUR SERVICES

Our health check covers all areas of your systems, providing you with a complete audit of:

- SharePoint infrastructure and topology
- SharePoint farm configuration
- SQL configuration and databases
- SharePoint services
- Web application health
- Updates and patching

Microsoft Partner

Gold Collaboration and Content
Gold Customer Relationship Management
Gold Enterprise Resource Planning
Gold Hosting
Silver Application Development
Silver Application Integration
Silver Data Analytics
Silver Data Platform
Silver Datacenter
Silver Intelligent Systems
Silver Midmarket Solution Provider

- Maintenance
- Monitoring, logging and usage
- SharePoint thresholds
- Site collection health

Deliverables

We provide you with a detailed report with an analysis of your SharePoint farm and recommendations for each module including risk and descriptions of why the recommendations were made. More fundamentally, the report will provide an answer to a key question – are you getting sufficient business value from your return on investment.
