

# Making Microsoft Teams Work for You

## Looking to increase collaboration and improve security?

Microsoft Teams offers modern collaboration, document management, and effective teamwork in a highly-secure environment.

Are you:

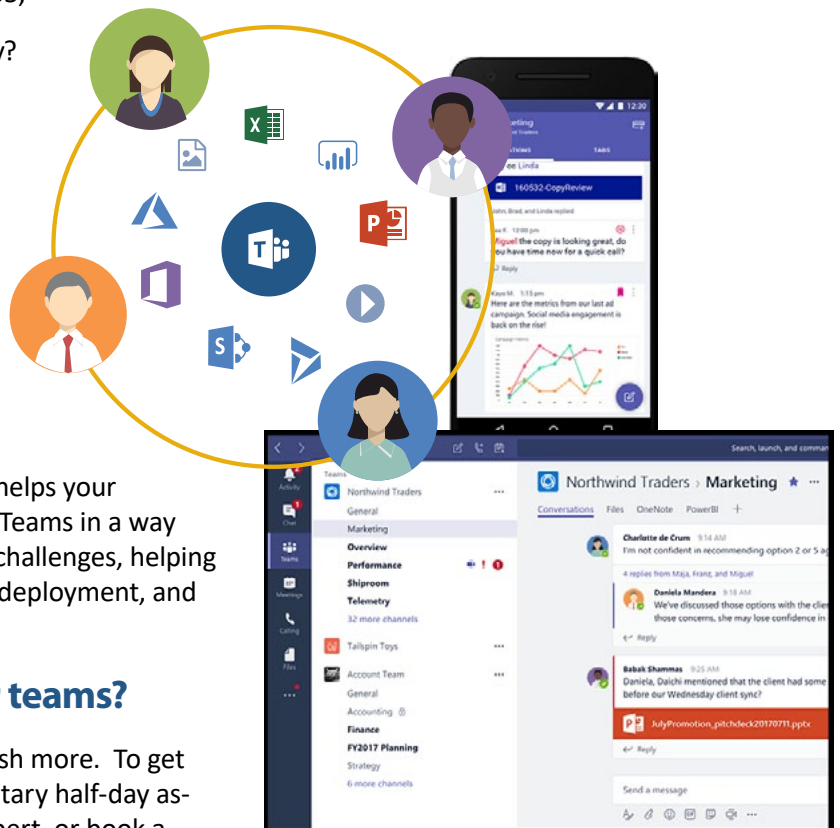

- Looking to leverage your existing O365, SharePoint, D365, Azure, Data, AI, or other Microsoft solution functionality?
- Evaluating a collaboration solution to implement from scratch?
- Interested in understanding how Microsoft Teams can benefit your organization?

## We can help!

As a Microsoft Gold Partner with end-to-end industry solutions and over 50 years of client success, Sierra Systems helps your organization take advantage of Microsoft Teams in a way that works best for your unique business challenges, helping to ensure successful user adoption, rapid deployment, and realize maximum benefits.

## Are you ready to enable your teams?

Work faster, iterate quicker, and accomplish more. To get started today, contact us for a complimentary half-day assessment with a Sierra Systems Teams expert, or book a 5-day consultation to evaluate your organization's readiness!

## Sierra Systems' Microsoft Teams Services features:

### Team Collaboration

- Threaded, persistent chat
- Conversations, files, and tools all live in a team workspace
- Integrated with SharePoint, OneDrive, OneNote, Power BI, Planner, Exchange and many other third-party applications
- Co-author and edit with Office and other files right in the application
- Tailor workspaces by topic, workstream, or business function
- Customizable and extensible including connectivity to your unique line of business applications

### Messaging and Calendaring

- Prioritize important messages automatically
- Share meeting availability internally and externally
- Schedule conference calls and video meetings with ease
- Reserve conference rooms seamlessly

### Content Sharing

- Share files with others inside and outside the organization securely
- Stay connected with files and folders when offline
- Recover previous versions and track changes

### Integration

- Central location for accessing your applications
- Integrate with non-Microsoft applications
- A central hub for working as team as well as individual work
- Seamless integration for all your line of business applications

### Enterprise Security & Compliance

- Broad compliance standards support
- Multi-factor authentication
- Information protection with Archive eDiscovery, Legal Hold, Compliance Content Search, Auditing and Reporting
- Data encryption at all times: at-rest and in-transit

## Benefits

Enable your team to work faster and smarter, all while ensuring security compliance.

- Increased employee engagement & empowerment
- Knowledge sharing – through ideation, innovation, and communities of practice
- Save time & collaborate more effectively – Entire teams are kept up-to-date as individuals iterate on a project
- Communicate better & stay connected - Chat, calls, and meetings for the modern workplace
- Easily integrated - Integrated Office 365 experience & Office 365 apps are built-in to manage all your conversations, files, and tools in one team workspace

### Microsoft Teams

Microsoft Teams is the digital hub that brings conversations, content, assignments, and apps together in one place.

- Chat for today's teams
- Easily access data in SharePoint, OneNote, Power BI, Planner and other applications through Office 365 integrations
- End-to-end security, control, and compliance powered by Office365

### Accelerating Businesses' IT
