

Experience the Power of PowerApps in Five Days

Ready Your PowerApps Strategy in Five Business Days

The volume and variety of new data sources is rapidly increasing and so is the demand to manipulate this data with end user tools. Sierra Systems, an NTT DATA Company, helps clients satisfy their need for improved data entry and rapid application development capabilities quickly and cost-effectively.

Sierra Systems' PowerApps in Five Days

PowerApps is a Software-as-a-Service (SaaS) Microsoft product based on an agile and community-driven delivery model. Organizations can create mobile-ready forms easily with PowerApps' simplified development environment. Our Microsoft experts assist you in achieving maximum business benefits quickly and cost-effectively in just five days.

DAY 1

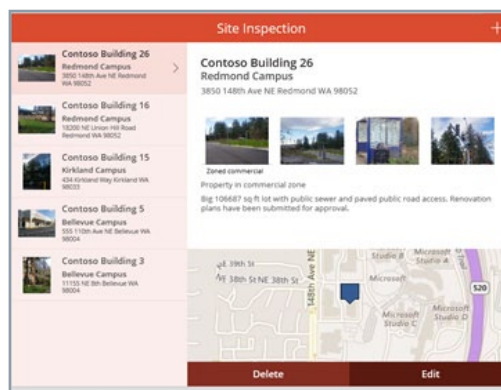

- Identify stakeholders
- Select Forms scenario (one)
- Select limited data set (1 to 3 tables from one or two cloud data sources)
- Define number of required PowerApps environments
- Review how GPS, image, or video could be leveraged
- Create PowerApp project

DAY 2

- Build the PowerApp including data sources

DAY 3

- Build the PowerApp including data sources

Transform your existing data sets into actionable, mobile-ready forms with Microsoft PowerApps

DAY 4

- Conclude building the PowerApp
- Test the PowerApp
- **Deploy the PowerApp**

DAY 5

- Share the PowerApp with stakeholders
- Review access and use
- Explore features, solutions and discuss next steps

Gold
**Microsoft
Partner**

PowerApps Benefits

- Build data entry forms with ease
- See how rapid app development can work in your business
- Get information to and from any device
- Collaborate across your organization
