Sierra Systems
an **NTT DATA** Company

Transform End-of-Life into Life-in-the-Cloud

Today's Digital Workplace Lives in Windows 10

Organizations hear the clock ticking and have started migrating to the digital workplace of Microsoft Windows 10. There is great variation in migration needs: small firms may want to leverage new cloud technologies while large organizations start planning full digital workplace migrations with minimal end user impact.

Regardless of where your organization is in its current migration, our certified experts present realistic options dictated by true business needs.

Everything You Need to Become a Digital Workplace

Readying your organization for Windows 10 digital workplace is at the heart of Sierra Systems, an NTT Data Company's Canadian expertise. Our Microsoft-award-winning experts guide your Windows 10 upgrade approach by incorporating your operational complexities into a design that conforms to - and enhances - end user productivity.

Your teams receive a proper approach for safe transition of operating system, data, and governance into the modern Digital Workplace, while advancing your system with:

- End-to-end Windows 10 upgrades, with optimized deployment options
- Collaboration enhancement via Teams, Office 365 and Azure toolsets
- Cloud design and architectural strategy
- Exchange mailbox migration
- Lync and Skype for Business Migration to Microsoft Teams
- Tools to launch "digital employees"

Enhancements are Forever

Opening Window 10's modern workplace is just the beginning. Today's cloud architecture is configured for "circular enhancement", where rolling updates launch continuous migrations to the latest feature sets. It is in here that the next wave of 'Digital Employees' will operate.

Our application management services (AMS) teams offer post-migration paths for upkeep of security (including data sovereignty), licensing and process optimization. These services are backed by decades of experience, and the expansive offerings of 200,000 worldwide resources through our new parent company, NTT DATA Services.

Countdown to Cloud

On-prem systems nearing end of support life from Microsoft include:

End-of-Life Schedule	
Windows 7	Jan 2020
Exchange	Jan 2020
Office Client	Oct 2020
Skype for Business	Oct 2020
SharePoint	Jul 2021

Updating is not mandatory, but does immediately expose systems to threats, potentially violating contracts regarding proper handling of client data.

Accelerating IT

Sierra Systems' 50+ years of deep expertise in targeted industries has built our reputation of delivering superior solutions that strengthen organizations' performance.
